The Aibot X6 An Indispensable Work Tool

The Aibot X6 is a hexacopter capable of autonomous flight, specifically designed for demanding tasks in surveying, mapping, and industrial inspection. Equipped with a high level of artificial intelligence, this flying robot reaches virtually any target and can independently create high-resolution images and videos.

Advantages of Utilizing the Aibot X6

- Go places that conventional equipment cannot reach
- Increase safety for your surveying staff
- Save time and money
- Get high quality, accurate results

The Aibot X6 supports you in numerous tasks

- Survey challenging sites such as quarries, sand pits, landfills, coal stockpiles, etc.
- Volume calculation
- Creation of location and inventory plans
- Creation of topographic maps
- Documentation of construction progress

We support professionals in the applications of mapping, surveying, industrial inspections, agriculture, and forestry.
